SUMMARY

Recent college graduate and to-be boot camp graduate with experience building and delivering full-stack MERN applications. Experienced in computer science concepts such as data structures, algorithms, and object-oriented programming. Proven success with full-stack development technologies through leading student teams to ensure high quality products. Actively seeking Junior Web Developer and/or Junior Software Engineer roles.

EDUCATION

Certificate, Full Stack Web Development – La Jolla, CA

March 2023 - Sept. 2023

- The Coding Boot Camp @ UC San Diego Extended Studies
- **Coursework:** HTML, CSS, JavaScript, jQuery, RESTful API, Node.js, object-oriented programming (OOP), Express.js, SQL, MongoDB, React, MVC, agile development, test-driven development (TDD)

Bachelor of Arts, Psychology – La Jolla, CA

June 2022

- University of California, San Diego
- **Coursework:** Data Structures, Object-Oriented Programming, Discrete Math, Statistics, Calculus

PROJECT EXPERIENCE

Portfolio - [live](#)

September 2023

- Developed a simple single-page React site to showcase my projects and provide some background on myself
- Utilized CSS animations to add interactive elements, creating a visually appealing and engaging user interface
- Implemented responsive design to enhance accessibility and provide an optimal viewing experience for different screen sizes
- **Technical Stack:** React, Tailwind CSS

Dagobah Depot - [GitHub](#)

July 2023

- Single-handedly built the backend of a full-stack Star Wars marketplace application by working heavily with Express.js, Sequelize ORM, and Handlebars.js while communicating closely with the frontend team
- Assisted with the implementation of Stripe.js to create the checkout system, allowing payments to be taken
- **Technical Stack:** Express.js, Sequelize ORM, Handlebars.js, Stripe.js

Pokédex Guide to Team Building - [GitHub](#)

May 2023

- Collaborated with three team members to develop a Pokémon application that utilizes APIs to grab relevant Pokémon information for users to easily access
- Employed Tailwind CSS to implement responsive design and animations to create a smooth yet compelling user experience
- **Technical Stack:** HTML, Tailwind CSS, JavaScript, jQuery, RESTful APIs

The Weather App - [GitHub](#)

May 2023

- Designed and programmed The Weather App, an application that utilizes Weather API to retrieve current weather information and five-day forecast for any city
- Applied UI/UX design principles in combination with Bootstrap CSS to produce an interface that is smooth and visually appealing while intuitive
- **Technical Stack:** HTML, Bootstrap CSS, JavaScript, jQuery, RESTful APIs

WORK EXPERIENCE

Rubio's Coastal Grill

October 2021 – June 2022

Guest Service Agent – La Jolla, CA

- Created a positive guest experience by providing excellent customer service, demonstrating knowledge of the menu, and ensuring speed/accuracy of orders and as a result increased overall guest satisfaction and tip rate

TECHNICAL PROFICIENCIES

JavaScript, Java, HTML, CSS, MySQL, MongoDB, React, Node.js, Express.js, RESTful API, GraphQL, jQuery, Git, Linux, Object-Oriented Programming (OOP), Data Structures, Agile Development, Test-Driven Development (TDD)
