SUMMARY

Recent college graduate and boot camp graduate with experience building and delivering full-stack MERN applications. Experienced in computer science concepts such as data structures, algorithms, and object-oriented programming. Proven success with full-stack development technologies through leading student teams to ensure high quality products. Actively seeking Web Developer and/or Software Engineer roles.

EDUCATION

The Coding Boot Camp @ UC San Diego Extended Studies – La Jolla, CA   **September 2023**
- Certificate, Full Stack Web Development
- **Coursework:** HTML, CSS, JavaScript, jQuery, RESTful API, Node.js, object-oriented programming (OOP), Express.js, SQL, MongoDB, Apollo GraphQL, React, MVC, agile development, test-driven development (TDD)

University of California, San Diego – La Jolla, CA   **June 2022**
- Bachelor of Arts, Psychology

TECHNICAL PROJECTS

Portfolio - live   **November 2023**
- Developed a simple **single-page React site** to showcase my projects and provide some background on myself
- Utilized CSS animations to add interactive elements, creating a visually appealing and engaging user interface
- Implemented **responsive design** to enhance accessibility and provide an optimal viewing experience for different screen sizes
- **Technical Stack:** React, Tailwind CSS

Questlog   **October 2023 – Present**
- Acting as the **sole full-stack developer** for a social media / web application for reviewing and tracking video games, **built with the MERN stack**
- Currently assisting UI/UX team with the **ideation and design phase** of the project, performing **user research** and **creating wireframes/prototypes**
- **Technical Stack:** MongoDB, Express.js, React, Node.js

Dagobah Depot - GitHub   **July 2023**
- Single-handedly **built the backend of a full-stack Star Wars marketplace application** by working heavily with **Express.js**, **Sequelize ORM**, and **Handlebars.js** while communicating closely with the frontend team
- Assisted with the implementation of **Stripe.js** to create the checkout system, allowing payments to be taken
- **Technical Stack:** Express.js, Sequelize ORM, Handlebars.js, Stripe.js

Pokédex Guide to Team Building - GitHub   **May 2023**
- Collaborated with three team members to develop a Pokémon application that utilizes **APIs** to grab relevant Pokémon information for users to easily access
- Employed **Tailwind CSS** to implement **responsive design** and animations to create a smooth yet compelling user experience
- **Technical Stack:** HTML, Tailwind CSS, JavaScript, jQuery, RESTful APIs

WORK EXPERIENCE

Beautederm   **July 2022 – Present**
Webmaster / E-Commerce Manager – Remote
- Designed and maintained **e-commerce store** using **Square eCommerce** to facilitate product promotions and sales
- Uploaded and **managed product listings**, ensuring accurate details and engaging visuals
- Implemented **search engine optimization (SEO) strategies** to maximize the store's visibility online

TECHNICAL SKILLS

JavaScript, Java, HTML, CSS, MySQL, MongoDB, React, Node.js, Express.js, RESTful API, GraphQL, jQuery, Git, Linux, Object-Oriented Programming (OOP), Data Structures, Agile Development, Test-Driven Development (TDD), Figma, Adobe Photoshop
